Zinc Saves Lives:

The Offence is running a **used battery collection** campaign as part of the "Zinc Saves Lives" program. Zinc is an essential micronutrient that is crucial for healthy growth and brain development. It strengthens the immune system and helps fight dangerous infection. Zinc is a life-saving treatment for diarrhea, which kills 600,000 children each year.

Many batteries contain zinc. Teck, a large zinc production company, will donate the cash equivalent to the value of zinc recycled from each battery collected to zinc and health programs in Kenya.

Battery collection boxes are in the office, room 319 and the library. Please bring your used batteries to help make zinc available to people who need it.
